摘要：

本研究探讨了香港的医疗差距问题，重点关注区域协作在应对老龄化人口医疗需求方面的作用。通过分析学术论文、政策文件、媒体报道和社会话语，本研究明确了香港医疗体系面临的主要挑战、相关政策以及当前跨境医疗服务的实践情况。受人口快速老龄化和慢性病负担的重压，香港的双轨制医疗体系在服务可及性和可持续性方面正面临巨大挑战。过度依赖公立医院、医护人员短缺、数字基础设施建设不足以及初级保健利用率低下等结构性低效问题，进一步加剧了就医障碍与财政压力。

与中国内地粤港澳大湾区（GBA）的融合提供了一个潜在的解决方案。通过医疗保险异地结算（携保过境）、电子健康档案以及长者医疗券等政策，使得跨境获取医疗服务成为可能。这些举措推动了以技术为驱动的适老化解决方案的发展，从而改善了老年人群的医疗服务可及性。当前的求医模式表明，人们正在策略性地利用大湾区的医疗服务，尤其是在牙科护理、慢性病管理和预防性筛查等领域。本研究强调了跨部门协作、数据系统互通以及政策创新在解决老龄化社会健康差距中的重要性。

Abstract: This study examines healthcare disparities in Hong Kong, focusing on the role of regional collaboration in addressing the healthcare needs of an aging population. The study identifies key challenges, policies, and current cross-border medical services practice in Hong Kong's healthcare system by analyzing academic papers, policy documents, media reports, and social discourse. Hong Kong's dual-track healthcare system, strained by rapid population aging and chronic disease burdens, faces challenges in access and sustainability. Structural inefficiencies, including over-reliance on public hospitals, workforce shortages, digital infrastructure, and underutilized primary care, exacerbate access barriers and financial pressures. The integration with mainland China's Greater Bay Area (GBA) offers a potential solution, enabling cross-border access to healthcare through policies like insurance portability, electronic health records, and Elderly Health Care Vouchers. These initiatives promote technology-driven, age-friendly solutions that improve care access for elderly populations. Care-seeking patterns reveal the strategic use of GBA services, especially for dental care, chronic disease management, and preventive screenings. This study underscores the importance of cross-sectoral collaboration, interoperable data systems, and policy innovation in addressing health disparities in aging societies.

Keywords: Cross-border care, Hong Kong, Greater Bay Area, Aging populations, Regional collaboration
